

Multiplication Squares

Directions: You will need 2 dice and 2 different colored markers. Roll the dice and multiply the two numbers. The player finds the product on the board and draws one line to connect part of the square around that product. When a player draws a line that closes a square, that player gets to color in the square. When all of the dots have been connected, the player with the most colored squares wins.

20	1	3	30	4	25	5	9	15
30	18	2	36	3	6	12	2	9
12	16	10	18	4	5	16	24	20
24	15	4	10	24	8	6	16	24
