Ed Poprik, Director

V-B

To: Board of School Directors
From: Ed Poprik
RE: **Educational Specification**
Date: October 28, 2013

Recommend that the Board of School Directors provide direction to the architect to continue with building design based upon the draft High School Educational Specifications presented and discussed at the October 21, 2013 work session.

Background: Attached is a progress report on the Educational Model (Ed Model) and Educational Specification (Ed Spec). This is not the final document.

This information is designed to collate previously shared information with the intent of helping the Board understand the spatial requirements of the Ed Spec and building design concepts outlined in the Ed Model. The Board will need to adopt these items to allow Crabtree Rohrbaugh and Associates to proceed with design options that match the Board's expectations for the project.
