The medieval knightly system had a religious, moral, and social code dating back to the Dark Ages.

The Knights Code of Chivalry and the legends of King Arthur and Camelot

The ideals described in the Code of Chivalry were emphasised by the oaths and vows that were sworn in the Knighthood ceremonies of the Middle Ages and Medieval era. These sacred oaths of combat were combined with the ideals of chivalry and with strict rules of etiquette and conduct. The ideals of a Knights Code of Chivalry was publicised in the poems, ballads, writings and literary works of Knights’ authors. The wandering minstrels of the Middle Ages sang these ballads and were expected to memorize the words of long poems describing the valour and the code of chivalry followed by the Medieval knights. The Dark Age myths of Arthurian Legends featuring King Arthur, Camelot and the Knights of the Round Table further strengthen the idea of a Knights’ Code of Chivalry. The Arthurian legend revolves around the Code of Chivalry which was adhered to by the Knights of the Round Table - Honour, Honesty, Valour and Loyalty.

A knight was expected to have not only the strength and skills to face combat in the violent Middle Ages but was also expected to temper this aggressive side of a knight with a chivalrous side to his nature. There was not an authentic Knights’ Code of Chivalry as such - it was a moral system which went beyond rules of combat and introduced the concept of Chivalrous conduct - qualities idealized by knighthood, such as bravery, courtesy, honor, and gallantry toward women.

The Knights Code of Chivalry was part of the culture of the Middle Ages and was understood by all. A Code of Chivalry was documented in The Song of Roland in the Middle Ages Knights period of William the Conqueror who ruled England from 1066. The 'Song of Roland' describes the 8th century Knights of the Dark Ages and the battles fought by the Emperor Charlemagne. The code has since been described as Charlemagne's Code of Chivalry. The Song of Roland was the most famous 'chanson de geste' and was composed between 1098-1100, describing the betrayal of Count Roland at the hand of Ganelon, and his resulting death in the Pyrenees Mountains at the hands of the Saracens. Roland was a loyal defender of his liege Lord Charlemagne and his code of conduct a description of the meaning of chivalry.

The Knights’ Code of Chivalry is described in the Song of Roland:

1. To fear God and maintain His Church
2. To serve the liege lord in valour and faith
3. To protect the weak and defenceless
4. To give succour to widows and orphans
5. To refrain from the wanton giving of offence
6. To live by honour and for glory
7. To despise pecuniary reward
8. To fight for the welfare of all
9. To obey those placed in authority
10. To guard the honour of fellow knights
11. To eschew unfairness, meanness and deceit
12. To keep faith
13. At all times to speak the truth
14. To persevere to the end in any enterprise begun
15. To respect the honour of women
16. Never to refuse a challenge from an equal
17. Never to turn the back upon a foe

Of the seventeen entries in the Knights Codes of Chivalry, according to the Song of Roland, at least 12 relate to acts of chivalry as opposed to combat.
