Math Homework

1. 3rd grade is going on a field trip to New York City (this is just math homework, not for real. I'm not made of money, okay?!) There are 19 students in Mr. Lutz's class, 21 in Mrs. Dillon's class, 19 students in Mrs. Roth's class, and 19 in Ms. Colavecchi's class. All 4 teachers are going as well. The coach buses only hold 35 people in each bus. 3rd grade has \$1,000 to spend on this trip. Each bus costs \$250.
 - a. About how many buses would 3rd grade need to purchase to go on this trip?
 - b. If 3rd grade wanted to see an art museum, each ticket costs \$3 per person. Round the number of people to the nearest 10 to estimate the total. Would everyone be able to attend the art museum? If so, how much money do we have leftover?
